PROFESSIONAL SUMMARY

Software Engineering student with strong foundation in backend development, REST APIs, and problem-solving using Python, C++, and FastAPI. Experienced in building scalable backend systems, API development, and deploying projects on cloud platforms (Vercel). Passionate about system design, AI integration, and building production-ready software solutions. Seeking a software engineering internship to contribute to high-impact engineering teams.

TECHNICAL SKILLS

Programming: Python, C++

Backend: FastAPI, REST APIs, API Development

Tools: Git, GitHub, Vercel, Blender

Concepts: OOP, System Design Basics, Backend Architecture, Problem Solving, Data Structures

PROJECTS

Decision Simulator | Backend System Project

- Designed and developed a decision-making engine to simulate outcomes based on user-defined parameters
- Built structured backend logic using Python with modular architecture
- Focus on performance optimization and logical flow handling
- Deployed live using Vercel for public access
- Tech Stack: Python, JavaScript, Vercel

Book Aura – AI-Powered Learning & Book Intelligence Platform (Ongoing)

- Backend Developer in a 4-member team project focused on AI-assisted learning
- Building scalable REST APIs using FastAPI for book management and AI tutor integration
- Designing backend architecture for real-time AI response handling and user interaction
- Collaborating in an Agile team environment with focus on system scalability

EXPERIENCE

TeleSales Marketer | UKR (Remote)

- Handled customer communication and sales operations in a UK-based telesales environment
- Improved negotiation, persuasion, and client relationship management skills
- Worked in target-driven performance setting

HACKATHONS

HackData V1 Hackathon – Participant (Team-based development)

AI/ML Hackathon – Participant (Built prototype solutions in team environment)

CERTIFICATIONS

Python Basics Certificate (Name to be updated)
